Pokusao sam s:

```
ssh -L22000:user2@server2:22 user1@server1
```

i onda ostanem logiran na server1 i trebao bih prebaciti neki file direktno s lokalne masine na server2?

No to mi nije uspjelo

Imam file1 na lokalnoj masini i kada pokusam:

```
scp -P 22000 file1 localhost:file1
```

dobijem gresku:

```
ssh: connect to host localhost port 22000: Connection refused  
lost connection
```

no i dalje sam logiran na server1

any ideas?
